

In-mould labelling solutions

James Townsend & Sons Ltd continues to pioneer and develop new technologies to the highest quality. The advances in film technology expands the finishes and textures now available to the IML market. We produce both Cut & Stack and Cut-in-Place IML using our High Quality Lithographic Sheet-Fed and Flexographic Reel-Fed Print Systems

With a wide range of finishes and ink systems we can produce labels for many specific applications, from Medical to Food environments.

Our dedicated staff can produce your labels from start to finish under the control of our ISO 9001:2000 and BRC/loP Management Systems to give you the confidence that your labels will fit your requirements first time, every time.

Printing on a vast range of films including specialist Metalised OPP and Cast PP films we can create a full range IML labels for a range of applications and design criteria.

By understanding your labelling requirements, we can improve your line efficiencies through our ability to select and engineer the best substrates, inks and varnishes.
